As a user, I want a graphical user interface (GUI) to interact with the audio library so that I can easily navigate through its features without relying on terminal commands.

As a developer, I want comprehensive documentation for the audio library's codebase, including information on its architecture, modules, classes, functions, and their respective purposes.

Graphical User Interface

Text Input fields
- Naming recorded files
- Naming new playlists
- Removing playlists

Playlists
- Pick sounds
- Save existing playlists

Treeview File selection
- Select a single or multiple sounds
- Display sound file metadata
- Sort by metadata

Command buttons
- Previous Play Next
- Reverse Random Layered
- Load sounds
  Record sound
  Delete playlist
  Exports sounds
- Playlist buttons

Documentation

README file
- Explain how to run
- List current features
- List needed Python libraries

Docstrings
- Specify function attributes
- Specify return value

Comments
